Youssouf Diallo

Frontend Developer · Angular · React · TypeScript · Firebase

Werl, Germany · Open to remote & relocation · youssoufdiamaldiallo@gmail.com · +49 162 6291461

Portfolio: youssouf-diallo.netlify.app · GitHub: github.com/Ydi5291 · Live product: afroconnect.shop

Profile

Frontend developer who builds and runs real products, not just demos. I designed, developed and launched **AfroConnect**, a live marketplace platform with an AI chatbot, Google Maps/Routes integration, payments and multi-role access, and built **Mitarbeiter Management**, a multi-tenant HR SaaS (PWA) with four user roles and server-side business rules. Before moving into development, I spent 7+ years in warehouse logistics (SAP, Microsoft Dynamics NAV), which gives me a strong understanding of business processes, ERP systems and the people who use them. Native French speaker, professional German, good English.

Technical skills

- **Frontend:** Angular, React, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, responsive design, PWA
- **Backend & cloud:** Firebase (Auth, Firestore, Cloud Functions), Node.js, REST APIs
- **Integrations:** OpenAI API (AI chatbot), Google Maps API & Routes API, payment and e-mail flows
- **Tools & workflow:** Git/GitHub, Netlify, CI/CD deployment, Angular Router, i18n (multilingual apps)
- **Business systems:** SAP (WMS), Microsoft Dynamics NAV (Navision), Excel incl. VBA

Projects

AfroConnect — Founder & Lead Developer · 2025 – present

E-commerce and marketplace platform for Afro-commerce merchants and their customers in Germany and the EU · afroconnect.shop

- Designed, built and launched the entire product on my own — UI/UX, business logic, payments and communication systems; live in production for about a year with partner shops
- Integrated **Diamal**, an AI chatbot built on the OpenAI API
- Integrated Google Maps API and Routes API so customers can find Afro shops within a 30 km radius
- Built a multi-role system (shop owners, delivery users, customers) with role-specific flows
- Delivered payments, transactional e-mails and product pages step by step through continuous iteration
- **Stack:** Angular, TypeScript, SCSS, Firebase, REST APIs, Netlify (CI/CD)

Mitarbeiter Management — HR SaaS (PWA) · 2026

Multi-tenant HR application for managing employees, absences, approvals and working time · mitarbeiter-management.netlify.app

- Multi-tenant SaaS architecture: each company gets an isolated workspace with its own employees, invitations, leave requests and time entries
- Role-based navigation, permissions and views for four user types (super admin, admin, employer, employee)
- Sensitive operations centralized in Firebase Cloud Functions, with server-side security rules
- PWA flows for time tracking, leave requests and HR approvals
- **Stack:** Angular, TypeScript, SCSS, Firebase Auth, Firestore, Cloud Functions, PWA

Personal portfolio · 2026

- Bilingual (German/English) single-page Angular application with section routing and scroll animations · youssouf-diallo.netlify.app

Work experience

Warehouse Logistics Specialist — Spedition Huckschlag GmbH, Fröndenberg · 07/2026 – present

- Responsible for outbound shipping of a key account (Amazon, DHL two-person handling, Otto/Hermes)
- Distribute picking orders and coordinate the picking team; check finished shipments
